PROFILE SUMMARY

Self-taught Software Developer with experience in Laravel, Node.js, React, Nest.js and TypeScript. A passionate and driven developer with a strong foundation in JavaScript, TypeScript, and PHP frameworks like Laravel. Experienced in building scalable backends using **Express, PrismaORM** and **Nest.js, TypeOrm**. Eager to contribute to open-source projects, continuously expanding knowledge in cutting-edge technologies, and applying creative problem-solving skills to deliver high-quality code. Always learning and improving, with a focus on modern technologies.

I dedicated significant time mastering programming fundamentals before advancing to frameworks, ensuring a solid foundation in core concepts.

WORK EXPERIENCE

G-Next Myanmar   **2024 May - Present**

React Developer

- Developed an expense-tracking application using Laravel and Tailwind CSS.
- Gained expertise in TypeScript, React, and Express by building a full-featured social media platform by learning from Sayar Ei Mg rockstar-developer book
- Contributed to Hybrid E-commerce & social media app powered by react.js for UI and along with Nest.js reliability for backend. Integrated notification feature and several other bugs fixes.
- Using Nest.js I have done several features such as notification, restore screen position on redirect, blocking/unblocking. API from Nest.js included. And other features using react as well.

HostMyanmar   **2023 September - 2024 April**

Junior Laravel Developer

- Managed and enhanced a **Laravel-based** HR project, adding critical features such as salary and attendance modules and troubleshooting
- learnt **Filament** and **Livewire** for project requirement and developed modules related to delivery and implemented PDF exporting for invoices.
- Created several responsive company portfolio templates utilizing HTML, CSS, and Bootstrap.
